

## SAMPLE STATEMENT OF PURPOSE FOR MS COURSE

Below is a sample statement of purpose written by a student applying to a University abroad for MS course.

Sample 2:

**This SOP has been written by a student who aspires to study MS in Chemical Engineering at Michigan Technological University.**

Name of the applicant: **Priya Swaminathan**

Course applied: **MS in Chemical Engineering**

My fascination with Chemistry started when I was six years old, when I went to an exhibition where different colourful chemicals and perfumes were being displayed.

Something about the brilliantly coloured liquids inspired me, and I told myself that I would like to become a scientist one day, playing around with chemicals. As I grew older, I realised the importance of Chemistry as a subject, and decided firmly that I would indeed become a chemical engineer.

I completed my Bachelor in Chemical Engineering from SSN College New Delhi with a CGPA of 8.50 from a maximum of 10 points. I then worked for two years as a trainee chemist in Alchrome Chemicals, Chennai. My two-year work experience helped me gain a clear idea about the pharmaceutical industry, and I was actively involved in a project that involved the formulation of herbal cough syrups and pain-relieving oil for relief from rheumatism. My interest in pharmaceutical chemistry has deepened, and I aspire to study MS in Chemical Engineering at **Michigan Technological University (MTU)** to improve my knowledge in various aspects of Chemical Engineering.

My ambition is to work on formulating herbal food supplements that would boost the immunity of young children, the aged people and pregnant women. I am sure that the highly acclaimed MS programme at your university will help me fulfil my ambition. I also hope that I will be able to work on a doctoral research programme at MTU.

Therefore, I request to consider my applications and let me be part of the exciting opportunities that are available at your university.
